

INTERVIEW SUMMARY

An interview was conducted telephonically on July 15, 2010 between the Examiner and Tue Nguyen, representing the Applicants. Claim 1 was discussed in view of *Bosch et al.* and *Wang et al*

The Examiner writes in the INTERVIEW SUMMARY mailed on July 21, 2010, that the parties “Discussed amending claim 1 to further define the shape and size of heater liner and amend the material of the claims to read ‘wherein the heater liner consist of aluminum or stainless steel’. Such an amendment appears to overcome the art of record.”

Applicants have amended claim 1 to recite “wherein the heater liner consists of a metal or a plurality of metals and is adapted to contact the plasma.”
